**MEMORANDUM**

**To:** Distribution List  
**From:** Cindy Rives *Cindy Rives*  
Undersecretary  
**Date:** February 12, 2020  
**Subject:** SFY 2019/20 Medicaid Monthly Forecast Report – January 2020

Attached, please find the Medicaid Forecast Report for January 2020. The report utilizes actual revenue and expenditures through January 30, 2020 and trends expenditures forward through June 30, 2020.

Compared to the prior month report, forecasted expenditures in total have decreased by \$25.2 million, largely driven by reductions in fee for service related to downward trends in utilization and decreases in the Buy-In program related to revised enrollment projections for the population. These reductions are offset by modest increases in the Managed Care line items – primarily the non-expansion population; the increase is driven by updated projections in enrollment.

From a revenue perspective, we continue to forecast excess budget authority in Inter-Governmental Transfers, which are classified as Self-Generated Revenue and in Premium Taxes and Provider Fees, which are classified as Statutory Dedications, as a result of forecasted expenditures for the expansion population currently projected to come in under budget as well as certain Fee for Service line items that impact the provider fees. Additionally, we are reporting excess federal budget authority largely driven by the Medical Loss Ratio refund (\$162M).

Over the months of December 2019 and January 2020, expansion enrollment increased by 26,449. The increase was the result of new enrollees generated by the open enrollment period for the federal marketplace. However, we do expect enrollment to trend back downward as we progress through the remaining months of the fiscal year, primarily due to quarterly wage checks which are scheduled to run mid-February and mid-May 2020.

Included in the report is the recipient enrollment numbers which can also be accessed via the department's web site at <http://ldh.la.gov/index.cfm/page/1275>. The department continues to monitor enrollment data and will update the associated assumptions and trends in our budget model in future monthly reports.

1) This report projects expenditures through the state fiscal year which ends on June 30<sup>th</sup>. However, the Medicaid program, which is funded by the federal government, operates on a federal fiscal year which ends on September 30<sup>th</sup>. Excess federal budget authority is used by the department to reconcile the 4<sup>th</sup> quarter of the federal fiscal year.

2) For revenues (Table-1), positive variances reported in the Over/(Under) column mean that projected revenues are greater than budget appropriations while negative variances indicate revenue shortfalls. However, for expenditures (Table-2), positive variances mean that projections are less than budget appropriations while negative variances indicate projections in excess of budget.
